

DURST BatteryFuel Gauge

NEW

Shows the status of your battery energy usage.
Flashing red warning light for low battery.
Highly visible multi-LED display.

Dual Volts 12-24

MODEL: BA-MV001

Specifications

System Voltage	DC12V / DC24V (Dual voltage)
Operating Voltage	± 25% of nominal voltage
Operating Ambient Temp	-20°C ~ +50°C
Storage Temperature	-30°C ~ +60°C
Time Delay	3 minutes
Diameter	52 mm
Weight	89 grams

Description

Model BA-MV001 is an inexpensive, one piece, easy to install battery fuel gauge. It is completely solid state and provides a reliable, accurate and easy to ready display of battery state of charge.

Features

- ⊙ All principal circuits are integrated in a single chip for long-life reliability.
- ⊙ A 10 LED displays the state of charge progressively LED by LED from full to empty.
- ⊙ AT 80% depth of discharge a flashing red LED signals an "empty" status warning.
- ⊙ For use with all kind of Lead Acid batteries & Deep-Cycle Batteries.

Application

These Battery Fuel Gauges are ideally suited for Electric Forklifts, Aerial Lifts, Electric Cars, Electric Boats, Electric Golf Carts, Floor Sweepers, Scissors Lifts, Mobile Homes, Caravans, UPS & Solar applications etc.

It shows the status of your battery energy usage

Flashing Red Warning Light for Low Battery
