

WASH YOUR HANDS OF TOXIC SOLVENTS

You too can wash your hands of toxic solvents with the NEW revolutionary WARM water based PARTS WASHING SYSTEM.

The Durst SmartWasher

Thoroughly cleans parts WITHOUT the usual dangerous toxic solvents. It never needs emptying because its ozzy enzymes actually eat all the waste on the spot! You don't pay to have waste removed which saves time and money as well as being Environmentally Friendly.

DSW-123
Mobile Sink

There's no need to replace cleaning fluid, just replace the enzyme impregnated filter once a month (which takes just 2 minutes) and periodically top up the ozzy juice. The machine will tell you when.

Roger Durst said, "Originally when we took on this agency, I read the information & quite frankly I thought it was too good to be true. So we initially put it to the test in a workshop application and asked them if the system was really that good. You know, they were so impressed, they made up their minds to purchase after only 3 days!"

*Warm water based PARTS WASHING SYSTEM
Thoroughly cleans - enzymes eat all the waste
NO harmful toxic solvents - non flammable
NO emptying & NO waste removal costs
Complies with NEW OH&S regulations
Safe on rubber components
Environmentally friendly
Saves time and money*
