

Durst SmartWasher OzzyBooster

Ozzy Booster is a microbial enhancer that customers can use to boost microbial activity by increasing the density of microbes. It contains both new microbes and additional nutrients that expand the available "territory" in which microbes can breed and eat. In most cases, the need for a "boost" never materializes - but when an overused machine needs a "kick in the microbes", Ozzy Booster does it. This liquid blend contains the same type of non-pathogenic microbes found in our regular Ozzy Mats (filters) which are classified as class 1 organisms having no risk to humans and animals.

Ozzy Booster can be used by anyone who is using a SmartWasher, but is only necessary in extreme usage situations where the fluid does not have a chance to recover before more contaminants are added. Ozzy Booster comes in a 250 ml. bottle and is added in 125 ml. doses approximately every two weeks as needed.

Part No: DSW-1070

OZZYSCENT (Apple Scent) Neutralizer

This Odour Neutralizer will take care of any odour that you may have in your SmartWasher. With it's green apple scent, it can cover up the smell that might have come from not changing the mat on time or simply from smelly parts. If it has been a while since you've changed the mat the microbes might have died off, thus nothing is cleaning the fluid. If it has not been too long, with the Neutralizer, Ozzy Booster, and a change of the Ozzymat (filter), you can get your SmartWasher back on track without having to change the fluid.

Part No: DSW-1080

DON'T FORGET TO CHANGE YOUR FILTER EVERY MONTH!
