Australian Made For Performance & Durability

FOR THE BENEFITS TO YOUR BUSINESS, THE COST IS PEANUTS!

Spread your profits more easily... with a new improved Durst Peanut Butter Mill.

The first to make it possible for stores in Australia to enjoy the profits of freshly ground peanut butter. Now we've developed a new improved Peanut Butter Mill which is enjoying excellent acceptance in Australia, New Zealand, Ireland, United Kingdom, France, Malaysia and as far a field as Uzbekistan!

 Freshly ground before their eyes, your customers can't help but be impressed.

 The unique taste keeps them coming back and that means more profits for you.

 The experience of considerable in-store use in Australia, together with the best of overseas expertise has been adapted to Australian requirements.

 Meticulously engineered by a highly respected third generation family company, the quality design and workmanship enables us to guarantee years of trouble free service.

“WHAT YOU SEE IS WHAT YOU GET” MESSAGE GENERATES SALES PLUS IT’S...

- Proudly Australian made
- Easy to clean - pleasing design
- Can be used for grinding other nuts
- New improved design for easier dismantling
- Exclusive design protects grinding adjustment
- Special sealed bearing for years of trouble free use
- Grinding plate & feeder are specially coated for long life
- Totally enclosed & fan cooled motor for dust-free safety
- Easily accessible reset button for overload protection
- With complete dismantling kit & pictorial instructions
- Robust rocker on/off switch with neon indicator light
- Heavy duty 3/4 HP motor for maximum efficiency
- Plugs into any ordinary power point
- Built to Australian Standard AS3000

IT JUST KEEPS DRAWING CUSTOMERS
 “A Durst mill was purchased for each of our 3 stores and now represents 400 units sold each week and the rate is increasing. Promotions are held every three months, with sales reaching as high as 2500 units per week. I believe these mills are unique to our industry and draw many customers to our stores.”
 Robert William
 Vita Health Foods, Sydney

SALES HAVE NOT REDUCED
 “As you are aware, we were very sceptical about these machines considering our small peanut butter sales. You certainly proved me wrong! the sales of peanut butter from your machine is just incredible. Each shop averages around 50 Kg of peanuts ground weekly. At first I thought it was the novelty of seeing the product freshly made but, after 6 months, the volume of sales and interest created hasn't reduced.”
 Vaughan Bullivant
 Natural Health Products
 Queensland

OUR SALES QUADRUPLED
 “We bought the mill after Helfex, now we have quadrupled our sales and peanut butter just walks out of the shop!”
 Angy Summers
 Surbiton Wholefoods United Kingdom

THANK YOU SO MUCH!
 “The purpose of this letter is to make sure you have available for us a Peanut Butter Mill, ready for the opening. There is no way that we could open without one of these wonderful mills. In each of our stores the mill has been a boom as a profit earner. It is simply unbelievable looking back, where in each of our stores we sold a few jars off the shelf to where we average between fifty to one hundred kilos of peanut butter per week.”
 Libby Riddley
 Libby's Health Foods, Gostford, NSW

INCREASE IN SALES
 “Before we had the mill we sold about 15 to 20 pots a week, now we average 80!”
 Jenny Bussey
 Good Health Whole Foods
 Gravesend, United Kingdom

AVERAGE OF 50KGS
 “It is really amazing what that piece of equipment has done for our sales. Prior to my purchasing it from you, I was selling only about six to ten jars of peanut butter per week. Now we are grinding approximately 50 Kg of peanuts per week into peanut butter.”
 Allan Phillips
 West Pennant Hills Health Foods
 Sydney

PROMOTION

Display hopper embossed for added impact.

With the Durst Peanut Butter Mill, your customers enjoy pure food as nature intended - free of added oil, salt, preservative and chemicals and that means more sales.

Patent Pending

SPECIFICATIONS

Weight 31Kg
 Width 235 mm
 Depth 525 mm
 Height 675 mm (with hopper)
 Voltage 240V single phase
 Hopper 5.5 Kg (peanuts)

INSTALLATION

The machine comes ready to install, plugging into an ordinary 240v power point, complete with all necessary tools and instruction.

PEANUTS

Dry, medium, roasted, blanched peanuts - either halves or pieces are recommended for best taste and keeping quality peanut butter.

MANUFACTURE

All Durst Peanut Butter Mills are subject to a variety of quality controls during manufacture. Every machine is thoroughly tested in a work situation before despatch.

OPERATION

The Mill is extremely easy to use and trouble-free. Simply put peanuts into the hopper, switch on, move the grind selector to the desired position and - presto! - fresh peanut butter.

MAINTENANCE

Detailed visual instructions are provided for cleaning and maintenance. Cleaning is very simple, requiring less than five minutes.
